

Price Revision for Denka Chloroprene (Denka CR)

Denka Company Limited hereby inform you that we have decided to enforce price revision for chloroprene rubber, which is offered under the brand name of “Denka Chloroprene” considering cost increase in our production and current supply and demand balance.

The price increase is more than USD500 or EUR450 per metric ton effective from 16th August, 2021.

We are facing difficulty of cost increase in our production such as raw materials and utility and cannot absorb all of the cost increase although we are making the best effort to minimize it.

On top of that, the CR global demand has been increasing significantly due to recovery from Covid-19 and it is impossible to cover all demand even from our existing customers.

Hence we decided to increase its selling price in order to maintain the stable supply and business continuity.

We deeply appreciate your continuous support and understanding on the price revision.

About Denka

Denka is a chemical manufacturer headquartered in Chuo-ku, Tokyo. The company specializes in developing business activities on a global scale across a wide range of fields, from inorganic and organic chemicals, to electronic materials and pharmaceuticals. Founded in 1915, Denka has steadily continued to develop and manufacture products that contribute to the development of society by fully utilizing its unique concepts and technological capabilities. Upholding its corporate slogan, “Possibility of chemistry” the company and its president, Toshio Imai, are committed to contributing to the sound development of the society while sincerely tackling the challenges that the society is now confronting.
