

Awarded “A-” for Climate Change and “A” rating for Water Security in CDP 2025

Denka Company Limited (Headquarters: Chuo-ku, Tokyo, Representative Director and President: Ikuo Ishida) has won a rating of “A-” for Climate Change in the 2025 scores announced by CDP, an international ESG rating organization, up one rank from the previous year. Furthermore, Denka received an “A” rating for Water Security for the second consecutive year.

CDP (headquartered in London) is an international non-profit organization that provides an environmental information disclosure system established in 2000 by a coalition of institutional investors around the world. The organization sends questionnaires on climate change, water security, and other issues to major companies around the world. Based on their responses, it evaluates the transparency of each company’s environmental information disclosure, management involvement, and other factors, scores the results, and publishes them. These ratings serve as an indicator for assessing corporate environmental activities.

Under the Mission 2030 corporate plan, which began in fiscal 2023, we have positioned the pursuit of sustainability as the cornerstone of our management. To achieve its goal of becoming carbon neutral by 2050, Denka has set a target to reduce CO₂ emissions by 60% by 2030 compared to fiscal 2013. We are also endeavoring to enhance the utilization efficiency of our own hydroelectric power plants, introduce other forms of renewable energy, drive process innovation, and reduce emissions throughout the entire product lifecycle. These efforts aim to increase long-term corporate value and deepen our ESG management.

Denka Company Limited will continue contributing to people’s daily lives and society by applying its world-class chemistry know-how based on the Purpose of Mission 2030: “Make the world a better place as specialists in chemistry.”
