

【Material patent】**Acetylene Black**

CN109643802 B	Easily dispersibility
CN116457427 B	Small particle
KR102411086 B	Easily dispersibility

Mix with other material

CN103975468 B	LFP+CB+CNT composite
CN101283055 B	AB+CNT composite
KR101255399 B	AB+CNT composite
KR101980796 B	LFP+CB+CNT composite

【Manufacturing method】

CN101528864 B	Manufacturing method of granulated AB
CN108136375 B	Manufacturing method of AB+CNT composite
KR101381472 B	Manufacturing method of granulated AB

【Application】**AB slurry**

CN113728064 B	Optimal particle size distribution
---------------	------------------------------------

Electrode coating liquid, Electrode, Battery

CN106030861 B	NMS cathode coating liquid containing AB
CN111316476 B	NMC cathode coating liquid containing CB+CNT
CN112106233 B	LCO cathode coating liquid containing CB+CNT
CN113169310 B	LFP cathode coating liquid containing CB+CNT
CN104603992 B	CB+CNT for cathode and anode, Easily dispersibility
CN109565050 B	Cathode coating liquid containing high performance binder
KR102630117 B	NMC cathode coating liquid containing CB+CNT
KR102350368 B	NMS cathode coating liquid containing AB
KR102492457 B	Cathode coating liquid having high storage stability
KR102121868 B	CB+CNT for cathode and anode, Easily dispersibility
KR102408332 B	Cathode coating liquid containing high performance binder
KR102387963 B	CB+CNT for electrode, Higher cycle performance
