

【Material patent】

Acetylene Black

JP5368685 B	Large particle
JP6581991 B	Middle particle
JP6219981 B	Easily dispersibility
JP6937761 B	Easily dispersibility
JP6714587 B	Surface modification
JP6604965 B	Surface modification
JP6929228 B	Catalyst carrier for FC
JP6563945 B	Catalyst carrier for FC
JP7568747 B	Small particle

Mix with other material

JP6600182 B	CNT, Easily dispersibility
JP6604854 B	CNT, Easily dispersibility
JP5518316 B	AB+CNT composite
JP6810042 B	CB+CNT composite
JP6068973 B	Water based binder
JP6982617 B	Binder for cathode
JP6936787 B	Binder for anode

【Manufacturing method】

JP5322652 B	Manufacturing method of granulated AB
JP6604854 B	Manufacturing method of CNT
JP6810042 B	Manufacturing method of AB+CNT composite

【Application】

AB slurry

JP7488813 B	Optimal particle size distribution
-------------	------------------------------------

Electrode coating liquid, Electrode, Battery

JP7423247 B	Cathode coating liquid containing PVA
JP7003190 B	Cathode coating liquid having high storage stability
JP7490567 B	LFP cathode coating liquid containing CB+CNT
JP7337049 B	NMC cathode coating liquid containing CB+CNT
JP7223999 B	LCO cathode coating liquid containing CB+CNT
JP7034077 B	CB+CNT for cathode, Easily dispersibility
JP6344740 B	CB+CNT for electrode, Higher cycle performance
JP6663851 B	Cathode coating liquid containing CNT
JP6283171 B	Cathode coating liquid containing small particle CB
